

Simply growing... Together!

PB 7192 seed corn group gives you solid performance, solid yields across the northern Corn Belt. Attractive plant size with impressive ear size

- ✓ Strong starting, good for minimum till soils
- ✓ Great late season health, good stand
- ✓ Outstanding yields
- ✓ Responds well to your good soils
- ✓ Yield responds well to top plant management
- ✓ Widely adapted

PROTINUS™ Seed Nutrition

Because a healthy start can make a world of difference™.

Area notes

Wonderful choice from south of a line across I-94 in Wisconsin, to Ludington, MI, down to Lansing and back up through the Michigan thumb area and down to the I-80 corridor.

PB 7192 3000GT

Agrisure3000GT

101 DAY RM

PLACEMENT CHARACTERISTICS

50% Silk GDUs	1400
Black Layer GDUs	2325
High Pop Tolerance	Very Good
Drought Tolerance	Very Good
Plant Health	Excellent

AGRONOMIC CHARACTERISTICS

Seedling Vigor	Very Good
Root Rating	Excellent
Stalk Rating	Excellent
Plant Height	Medium-Tall
Ear Placement	Medium

EAR AND GRAIN CHARACTERISTICS

Ear Length	Medium
Ear Flex	Fixed
Kernel Rows	18
Dry Down	Excellent
Test Weight	Very Good
Yield	Excellent

SUGGESTIONS FOR THE BEST RESULTS

Works well in irrigated/productive fields. Good emergence in no-till/cold soils.

Know Your Agrisure® Traits

-  **Agrisure Viptera™** Agrisure Viptera will be combined with Agrisure® 3000GT trait stack to form the new Agrisure Viptera 3111 trait stack. The Agrisure Viptera™ 3111 trait stack delivers the broadest available spectrum of multi-pest control over 14 yield- and quality-robbing insects, both above and below ground.
-  **Agrisure 3000GT** The triple stack that helps reach maximum yield potential. Agrisure 3000GT guards against both corn borer and corn rootworm, with tolerance to in-season applications of both glyphosate and glufosinate herbicides
-  **Agrisure GT/CB/LL** Combines the convenience and proven performance of glyphosate-tolerance, corn borer resistance and tolerance to glufosinate herbicide into a single hybrid
-  **Agrisure GT** Provides tolerance to in-crop applications of glyphosate-based herbicides while offering growers a full range of assurances and the freedom to choose their preferred glyphosate brand
-  **Agrisure CB/LL** Helps reach maximum yield potential by providing excellent control of European corn borer and other damaging insects as well as tolerance to glufosinate herbicides
-  **Agrisure CB/LL/RW** Provides season-long protection from corn borer and tolerance to glufosinate herbicides stacked with industry-leading control of rootworm

For more information, visit agrisuretraits.com.

LIBERTY LINK Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn, and combine high-yielding genetics with the powerful, non-selective, postemergent weed control of Ignite® herbicide for optimum yield and excellent weed control.

Products with the Agrisure Viptera trait will not be available for sale prior to Syngenta obtaining all necessary import approvals.

Planting Refuges, Preserving Technology

Before opening a bag of seed, be sure to read and understand the stewardship requirements, including applicable refuge requirements for insect resistance management, for the biotechnology traits expressed in the seed set forth in the technology agreement that you sign. By opening and using a bag of seed, you are reaffirming your obligation to comply with those stewardship requirements.

Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn, and combine high-yielding genetics with the powerful, non-selective, postemergent weed control of Ignite® herbicide for optimum yield and excellent weed control.
