

Simply growing... Together!

x

PB 7632 is a NEW Partners Brand Hybrid! A top tier yield hybrid. The GT/CB/LL trait package provides great protection at a good value. Great emergence, strong stalks. Good looking corn that fits well on most soils, with good flex.

- ✓ Good looking ears all along your rows
- ✓ Good test weights
- ✓ Great grain quality and yield
- ✓ Great for your average, variable soil fields
- ✓ Yields you will be very happy with

#### Area notes

Great selection for the area across central IA, northern IL, IN, and OH, across the I-80 corridor.

## 106 DAY RM

### PLACEMENT CHARACTERISTICS

|                    |           |
|--------------------|-----------|
| 50% Silk GDUs      | 1285      |
| Black Layer GDUs   | 2450      |
| High Pop Tolerance | Good      |
| Drought Tolerance  | Very Good |
| Plant Health       | Good      |

### AGRONOMIC CHARACTERISTICS

|                |             |
|----------------|-------------|
| Seedling Vigor | Very Good   |
| Stalk Rating   | Very Good   |
| Root Rating    | Good        |
| Plant Height   | Medium-Tall |
| Ear Height     | Medium High |

### EAR AND GRAIN CHARACTERISTICS

|             |           |
|-------------|-----------|
| Ear Length  | Very Good |
| Ear Flex    | Semi Flex |
| Kernel Rows | 14-18     |
| Dry Down    | Very Good |
| Test Weight | Average   |
| Yield       | Very Good |

### SUGGESTIONS FOR THE BEST RESULTS

## Know Your Agrisure® Traits

-  **Agrisure Viptera™** Agrisure Viptera will be combined with Agrisure® 3000GT trait stack to form the new Agrisure Viptera 3111 trait stack. The Agrisure Viptera™ 3111 trait stack delivers the broadest available spectrum of multi-pest control over 14 yield- and quality-robbing insects, both above and below ground.
-  **Agrisure 3000GT** The triple stack that helps reach maximum yield potential. Agrisure 3000GT guards against both corn borer and corn rootworm, with tolerance to in-season applications of both glyphosate and glufosinate herbicides
-  **Agrisure GT/CB/LL** Combines the convenience and proven performance of glyphosate-tolerance, corn borer resistance and tolerance to glufosinate herbicide into a single hybrid
-  **Agrisure GT** Provides tolerance to in-crop applications of glyphosate-based herbicides while offering growers a full range of assurances and the freedom to choose their preferred glyphosate brand
-  **Agrisure CB/LL** Helps reach maximum yield potential by providing excellent control of European corn borer and other damaging insects as well as tolerance to glufosinate herbicides
-  **Agrisure CB/LL/RW** Provides season-long protection from corn borer and tolerance to glufosinate herbicides stacked with industry-leading control of rootworm

For more information, visit [agrisuretraits.com](http://agrisuretraits.com).

Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn, and combine high-yielding genetics with the powerful, non-selective, postemergent weed control of Ignite® herbicide for optimum yield and excellent weed control.

Products with the Agrisure Viptera trait will not be available for sale prior to Syngenta obtaining all necessary import approvals.

Planting Refuges, Preserving Technology

Before opening a bag of seed, be sure to read and understand the stewardship requirements, including applicable refuge requirements for insect resistance management, for the biotechnology traits expressed in the seed set forth in the technology agreement that you sign. By opening and using a bag of seed, you are reaffirming your obligation to comply with those stewardship requirements.

Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn, and combine high-yielding genetics with the powerful, non-selective, postemergent weed control of Ignite® herbicide for optimum yield and excellent weed control.
