

Simply growing... Together!

PB 7964 is a NEW, food grade quality, conventional hybrid to our lineup bringing a strong, consistent yield, very dependable hybrid in the 108-110 day range. It brings a very healthy stand in your fields. Semi flex type of hybrid so you can plant high populations in your good ground but will also see a good stand in sandy soils. Attractive dark green appearance with upright look. You will see consistent performance from this proven hybrid.

- ✓ Good strong, consistent yield potential
- ✓ Good root and stalk strength
- ✓ Fights off disease pressures
- ✓ Yield responds well to top plant management
- ✓ Puts on ear even during stress periods
- ✓ Widely adaptable to various soil types
- ✓ Good partner throughout central and eastern Corn Belt
- ✓ Outstanding "stay green" quality

Area notes

Does great also through the prairie soils from central IL, south of I-80 down to I-72, across IN and OH from I-80 down to I-74 to Indianapolis across I-70 into OH where you can get top yields using higher populations and right on through the eastern degree market.

PB 7964

109 DAY RM

PLACEMENT CHARACTERISTICS

50% Silk GDUs	1450
Black Layer GDUs	2600
High Pop Tolerance	Very Good
Drought Tolerance	Very Good
Plant Health	Excellent

AGRONOMIC CHARACTERISTICS

Seedling Vigor	Good
Stalk Rating	Good
Root Rating	Good
Plant Height	Med Tall
Ear Height	Medium-High

EAR AND GRAIN CHARACTERISTICS

Ear Length	Medium
Ear Flex	Semi Flex
Kernel Rows	14-18
Test Weight	Excellent
Yield	Very Good

SUGGESTIONS FOR THE BEST RESULTS

Fungicide treatment for best yield.
Manage corn borer if see pressure.

Know Your Agrisure® Traits

-  **Agrisure Viptera™** Agrisure Viptera will be combined with Agrisure® 3000GT trait stack to form the new Agrisure Viptera 3111 trait stack. The Agrisure Viptera™ 3111 trait stack delivers the broadest available spectrum of multi-pest control over 14 yield- and quality-robbing insects, both above and below ground.
-  **Agrisure 3000GT** The triple stack that helps reach maximum yield potential. Agrisure 3000GT guards against both corn borer and corn rootworm, with tolerance to in-season applications of both glyphosate and glufosinate herbicides
-  **Agrisure GT/CB/LL** Combines the convenience and proven performance of glyphosate-tolerance, corn borer resistance and tolerance to glufosinate herbicide into a single hybrid
-  **Agrisure GT** Provides tolerance to in-crop applications of glyphosate-based herbicides while offering growers a full range of assurances and the freedom to choose their preferred glyphosate brand
-  **Agrisure CB/LL** Helps reach maximum yield potential by providing excellent control of European corn borer and other damaging insects as well as tolerance to glufosinate herbicides
-  **Agrisure CB/LL/RW** Provides season-long protection from corn borer and tolerance to glufosinate herbicides stacked with industry-leading control of rootworm

Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn, and combine high-yielding genetics with the powerful, non-selective, postemergent weed control of Ignite® herbicide for optimum yield and excellent weed control.

Products with the Agrisure Viptera trait will not be available for sale prior to Syngenta obtaining all necessary import approvals.
