PB 8129 Viptera

PB 8129 seed corn offers you great seed with the new Viptera 3111 trait option and this is one hybrid providing a great opportunity for good yields in any heavy pressure environment. Consistency, standability, and great health make this a solid performer for you.

- ✓ Great start, great growth, excellent stand
- ✓ Outstanding late season health
- ✓ Good for various tillage methods
- ✓ Good stand and look through harvest
- ✓ Good for corn on corn
- ✓ Yield responds well to top plant management
- ✓ Adapts to various soil types and environments

Area notes

Great selection throughout Illinois, Indiana, and Ohio south of La Crosse, WI, to north of Milwaukee, WI, and from Zeeland, MI across to Lansing, MI, south to St. Louis, MO, to Champaign, IL, to Indianapolis, IN, to Dayton and south.

111 DAY RM

PLACEMENT CHARACTERISTICS

50% Silk GDUs	1280
Black Layer GDUs	2700
High Pop Tolerance	Very Good
Drought Tolerance	Very Good
Plant Health	Very Good

AGRONOMIC CHARACTERISTICS

Seedling Vigor	Very Good
Root Rating	Excellent
Stalk Rating	Excellent
Plant Height	Medium Tall
Ear Placement	Medium High

EAR AND GRAIN CHARACTERISTICS

Ear Length	Medium
Ear Flex	Semi-Flex
Kernel Rows	16-18
Dry Down	Very Good
Test Weight	Good
Yield	Very Good

Know Your Agrisure® Traits

-  **Agrisure Viptera™** Agrisure Viptera will be combined with Agrisure® 3000GT trait stack to form the new Agrisure Viptera 3111 trait stack. The Agrisure Viptera™ 3111 trait stack delivers the broadest available spectrum of multi-pest control over 14 yield- and quality-robbing insects, both above and below ground.
-  **Agrisure 3000GT** The triple stack that helps reach maximum yield potential. Agrisure 3000GT guards against both corn borer and corn rootworm, with tolerance to in-season applications of both glyphosate and glufosinate herbicides
-  **Agrisure GT/CB/LL** Combines the convenience and proven performance of glyphosate-tolerance, corn borer resistance and tolerance to glufosinate herbicide into a single hybrid
-  **Agrisure GT** Provides tolerance to in-crop applications of glyphosate-based herbicides while offering growers a full range of assurances and the freedom to choose their preferred glyphosate brand
-  **Agrisure CB/LL** Helps reach maximum yield potential by providing excellent control of European corn borer and other damaging insects as well as tolerance to glufosinate herbicides
-  **Agrisure CB/LL/RW** Provides season-long protection from corn borer and tolerance to glufosinate herbicides stacked with industry-leading control of rootworm

LIBERTY LINK Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn, and combine high-yielding genetics with the powerful, non-selective, postemergent weed control of Ignite® herbicide for optimum yield and excellent weed control.

Products with the Agrisure Viptera trait will not be available for sale prior to Syngenta obtaining all necessary import approvals.

Planting Refuges, Preserving Technology

Before opening a bag of seed, be sure to read and understand the stewardship requirements, including applicable refuge requirements for insect resistance management, for the biotechnology traits expressed in the seed set forth in the technology agreement that you sign. By opening and using a bag of seed, you are reaffirming your obligation to comply with those stewardship requirements.

Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn, and combine high-yielding genetics with the powerful, non-selective, postemergent weed control of Ignite® herbicide for optimum yield and excellent weed control.
