PB 8441 GT/CB/LL

Agrisure®GT/CB/LL

LIBERTY
LINK™
IGNITE™ HERBICIDE TOLERANT

114 DAY RM

PB 8441 is a very showy, healthy plant with dark green appearance. Plant this if you want solid performance with high populations and narrow rows.

- ✓ Taller plant type, good for silage
- ✓ Good selection if you have an ethanol plant
- ✓ Yield responds well to top plant management
- ✓ Exceptional performance under stress
- ✓ Consistent yields in all types of soils
- ✓ Excellent choice if going continuous corn
- ✓ Upright leaves work great for narrow rows

Area notes

Great selection for temperatures and soils south of a line from the southern border of Iowa, across to Springfield, IL, Terra Haute, IN, up to Greencastle, IN and down to Franklin, IN and across to the south of Dayton, OH, over to Lancaster, OH and south.

PLACEMENT CHARACTERISTICS

50% Silk GDUs	1300
Black Layer GDUs	2370
High Pop Tolerance	Very Good
Drought Tolerance	Excellent
Plant Health	Excellent

AGRONOMIC CHARACTERISTICS

Seedling Vigor	Very Good
Root Rating	Excellent
Stalk Rating	Very Good
Plant Height	Medium Tall
Ear Placement	Medium

EAR AND GRAIN CHARACTERISTICS

Ear Length	Medium
Ear Flex	Semi Flex
Kernel Rows	16-18
Dry Down	Medium
Test Weight	High
Yield	Very Good

SUGGESTIONS FOR THE BEST RESULTS

Fertilize well and possible fungicide treatment for best yields.

Know Your Agrisure® Traits

-  Agrisure Viptera™ will be combined with Agrisure® 3000GT trait stack to form the new Agrisure Viptera 3111 trait stack. The Agrisure Viptera™ 3111 trait stack delivers the broadest available spectrum of multi-pest control over 14 yield- and quality-robbing insects, both above and below ground.
-  Agrisure 3000GT The triple stack that helps reach maximum yield potential. Agrisure 3000GT guards against both corn borer and corn rootworm, with tolerance to in-season applications of both glyphosate and glufosinate herbicides
-  Agrisure GT/CB/LL Combines the convenience and proven performance of glyphosate-tolerance, corn borer resistance and tolerance to glufosinate herbicide into a single hybrid
-  Agrisure GT Provides tolerance to in-crop applications of glyphosate-based herbicides while offering growers a full range of assurances and the freedom to choose their preferred glyphosate brand
-  Agrisure CB/LL Helps reach maximum yield potential by providing excellent control of European corn borer and other damaging insects as well as tolerance to glufosinate herbicides
-  Agrisure CB/LL/RW Provides season-long protection from corn borer and tolerance to glufosinate herbicides stacked with industry-leading control of rootworm

For more information, visit agrisuretraits.com.

LIBERTY LINK Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn, and combine high-yielding genetics with the powerful, non-selective, postemergent weed control of Ignite® herbicide for optimum yield and excellent weed control.

Products with the Agrisure Viptera trait will not be available for sale prior to Syngenta obtaining all necessary import approvals.

Planting Refuges, Preserving Technology

Before opening a bag of seed, be sure to read and understand the stewardship requirements, including applicable refuge requirements for insect resistance management, for the biotechnology traits expressed in the seed set forth in the technology agreement that you sign. By opening and using a bag of seed, you are reaffirming your obligation to comply with those stewardship requirements.

Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn, and combine high-yielding genetics with the powerful, non-selective, postemergent weed control of Ignite® herbicide for optimum yield and excellent weed control.
