\*\* B.t. included. Where noted on our literature or price list, Avicta Complete Corn may be included and is a promotional combination of separately registered products containing Avicta® Duo Corn nematocidal/insecticide and one or more of the following: Cruiser® insecticide, Apron XL®, Maxim® XL and/or Dynasty® fungicide(s). Visit [www.syngentacropprotection.com](http://www.syngentacropprotection.com). Important: Always read and follow label instructions before buying or using Syngenta products. Avicta Duo Corn® is a Restricted Use Pesticide. Avicta Duo Corn® is a trademark of a Syngenta Group Company.

\*VTRR protects against rootworm and is Roundup Ready.

Agrisure® is a registered trademark of a Syngenta Group Company. For more information, visit [www.agrisuretraits.com](http://www.agrisuretraits.com).

LibertyLink®, Ignite® and the Water Droplet logo are trademarks or registered trademarks of Bayer.

Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn, and combine high-yielding genetics with the powerful, non-selective, postemergent weed control of Ignite® herbicide for optimum yield and excellent weed control.

- Agrisure Viptera<sup>3M</sup>** The Agrisure Viptera<sup>3M</sup> trait combines with the Agrisure 3000GT trait stack to form the Agrisure Viptera<sup>3M</sup> 3111 trait stack. The Agrisure Viptera 3111 trait stack delivers the broadest available spectrum of multi-pist control of over 14 yield- and quality-robbing insects, both above and below ground, as well as tolerance to glyphosate and glufosinate herbicides.
- Agrisure Viptera<sup>3M</sup>** The Agrisure Viptera<sup>3M</sup> trait combines with the Agrisure GT/CB/LL trait stack to create the Agrisure Viptera<sup>3M</sup> 3110 trait stack. For growers who do not need to manage for corn rootworm, the Agrisure Viptera 3110 trait stack delivers glyphosate and glufosinate tolerance and the broadest available control of above-ground insects.
- Agrisure 3000GT** The Agrisure 3000GT triple stack helps growers guard against both corn borer and corn rootworm in addition to tolerance of in-season applications of both glyphosate and glufosinate herbicides.
- Agrisure GT/CB/LL** The Agrisure GT/CB/LL trait stack combines the convenience and proven performance of glyphosate and glufosinate herbicide tolerance with corn borer resistance.
- Agrisure GT** The Agrisure GT trait provides tolerance to in-crop applications of glyphosate-based herbicides with the freedom for growers to choose their preferred glyphosate brand.
- Agrisure CB/LL** The Agrisure CB/LL trait provides excellent control of European corn borer and other damaging insects, as well as tolerance to glufosinate herbicides.
- Agrisure CB/LL/RW** The Agrisure CB/LL/RW trait stack provides season-long protection from corn borer and tolerance to glufosinate herbicides, along with industry-leading control of rootworm.

Monsanto Company is a member of Excellence Through Stewardship® (ETS). Monsanto products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Monsanto's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. This product has been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. Excellence Through Stewardship® is a registered trademark of Biotechnology Industry Organization.

\*\*\*B.t. products may not yet be registered in all states. Check with your Monsanto representative for the registration status in your state.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. Roundup Ready® crops contain genes that confer tolerance to glyphosate, the active ingredient in Roundup® brand agricultural herbicides. Roundup® brand agricultural herbicides will kill crops that are not tolerant to glyphosate. Genuity®, Genuity and Design®, Genuity Icons, Roundup®, Roundup PowerMAX®, Roundup Ready®, Roundup Ready 2 Technology and Design®, VT Triple PRO™, YieldGard®, YieldGard Corn Borer and Design®, and YieldGard Rootworm and Design® are trademarks of Monsanto Technology LLC. Respect the Refuge® and Respect the Refuge and Corn Design® are registered trademarks of National Corn Growers Association. ©2010 Monsanto Company.

Before opening a bag of seed, be sure to read, understand and accept the stewardship requirements, including applicable refuge requirements for insect resistance management, for the biotechnology traits expressed in the seed as set forth in the Monsanto Technology/Stewardship Agreement that you sign. By opening and using a bag of seed, you are reaffirming your obligation to comply with the most recent stewardship requirements.
